

MAKE SENSE OF SUSTAINABILITY

▶ TAKE A TRIP ON THE TRAIL ◀

Swansea Sustainability Trail is a great teaching and learning resource for schools, colleges and communities. It can be used to support the delivery of ESDGC (education for sustainable development and global citizenship) and promote greater understanding of sustainability.

The Trail has recently been extended to **27 local projects** and sites which provide inspiring and practical examples of sustainability. Most offer activities and talks linked to the school curriculum and many are suitable for further and higher education, adult and community education, youth work and work-based learning.

Visiting groups generally select two or three Trail sites to visit in a single trip – combining projects that feature similar or contrasting sustainability themes, or projects located in the same area. Sustainable Swansea can contribute up to **£100 towards transport** costs and may also be able accompany a tour.

For more information and ideas, visit the Sustainability Trail web pages, www.sustainableswansea.net/sustainability-trail.html, where you can browse details on each Trail project and sustainability theme, download the new Trail leaflet and access sample education tour sheets with curriculum links and practical information.

Swansea Sustainability Trail is part of the Sustainable Swansea Initiative managed by Swansea Environmental Forum in partnership with Swansea Environment Centre, the City and County of Swansea and Swansea CVS.
